Employment & Transfer Statistics

GRADUATE REPORT

Dear Friend of Southeast Community College,

On behalf of the Board of Governors, the alumni, faculty, staff, and students of this excellent institution, I am pleased to present Southeast Community College's Graduate Report. The report includes graduation and employment statistics associated with 2021 graduates from all of our applied technology and transfer programs.

The report includes the total number of graduates and degrees granted, the number employed within the training-related field, the number continuing their education, the percent employed within Nebraska, and the average starting salary for SCC graduates. In addition to graduation and employment statistics, the report includes the colleges and universities to which our graduates transferred, as well as the employers and starting positions associated with each of SCC's program graduates.

This report represents one of our many efforts to evaluate the success of our programs and the degree to which we are accomplishing our mission.

SCC is committed to its mission of providing the highest quality applied technology and academic education opportunities to its 15-county service area. SCC's 2021 graduates had the added challenge of successfully earning their credentials during the COVID-19 pandemic. These graduates exhibited incredible resiliency, determination, and flexibility. SCC had more than 1,300 graduates in 2021, with 96% employed or continuing their education immediately after graduation. Eighty-six percent of our employed graduates are working in Nebraska. On behalf of SCC, I congratulate our faculty, staff, and graduates for this incredible accomplishment.

SCC has a long history of ensuring that employers have access to qualified graduates who have the skills needed for successful and productive employment. SCC continually seeks to align its programs and expand its capacity to meet the specific needs and requirements of employers, communities, and transfer institutions. We are committed to meeting the educational needs of our students, employers and the community.

Sincerely,

A handwritten signature in black ink that reads "Paul Illich". The signature is fluid and cursive, with a large, stylized "P" and "I".

Paul Illich, President

Southeast Community College

The mission of Southeast Community College is to empower and transform its students and the diverse communities it serves. The College provides accessible, dynamic, and responsive pathways to career and technical, academic transfer, and continuing education programs. Student success and completion is maximized through collegiate excellence, exemplary instruction, comprehensive student support services, enrichment programs, and student-centered processes. SCC is committed to a proactive and evidence-based approach that continually assesses and responds to student, community, and employer demand for higher education.

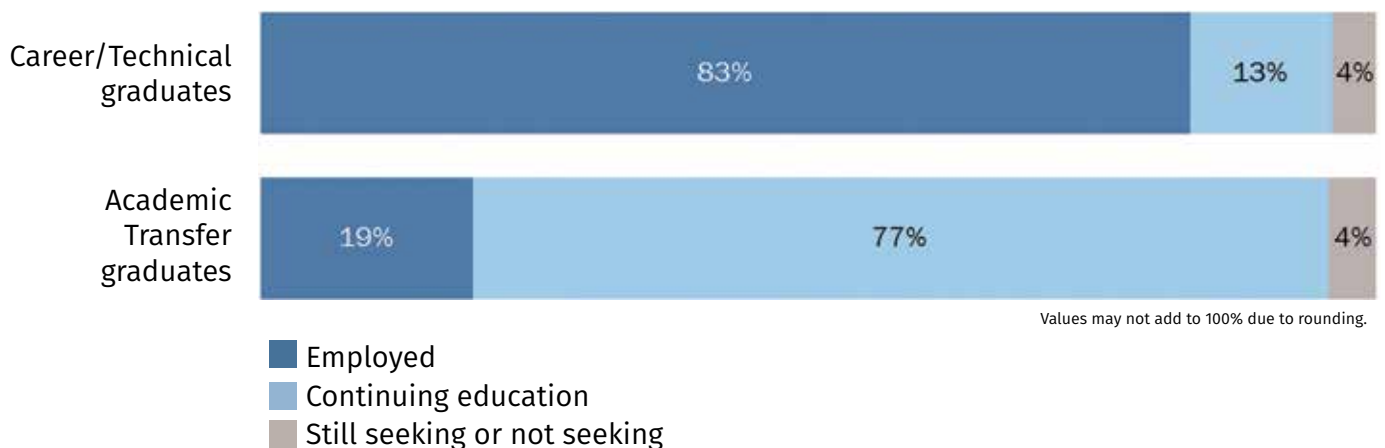

96% SUCCESS RATE

SCC graduates who are employed or continuing their education.

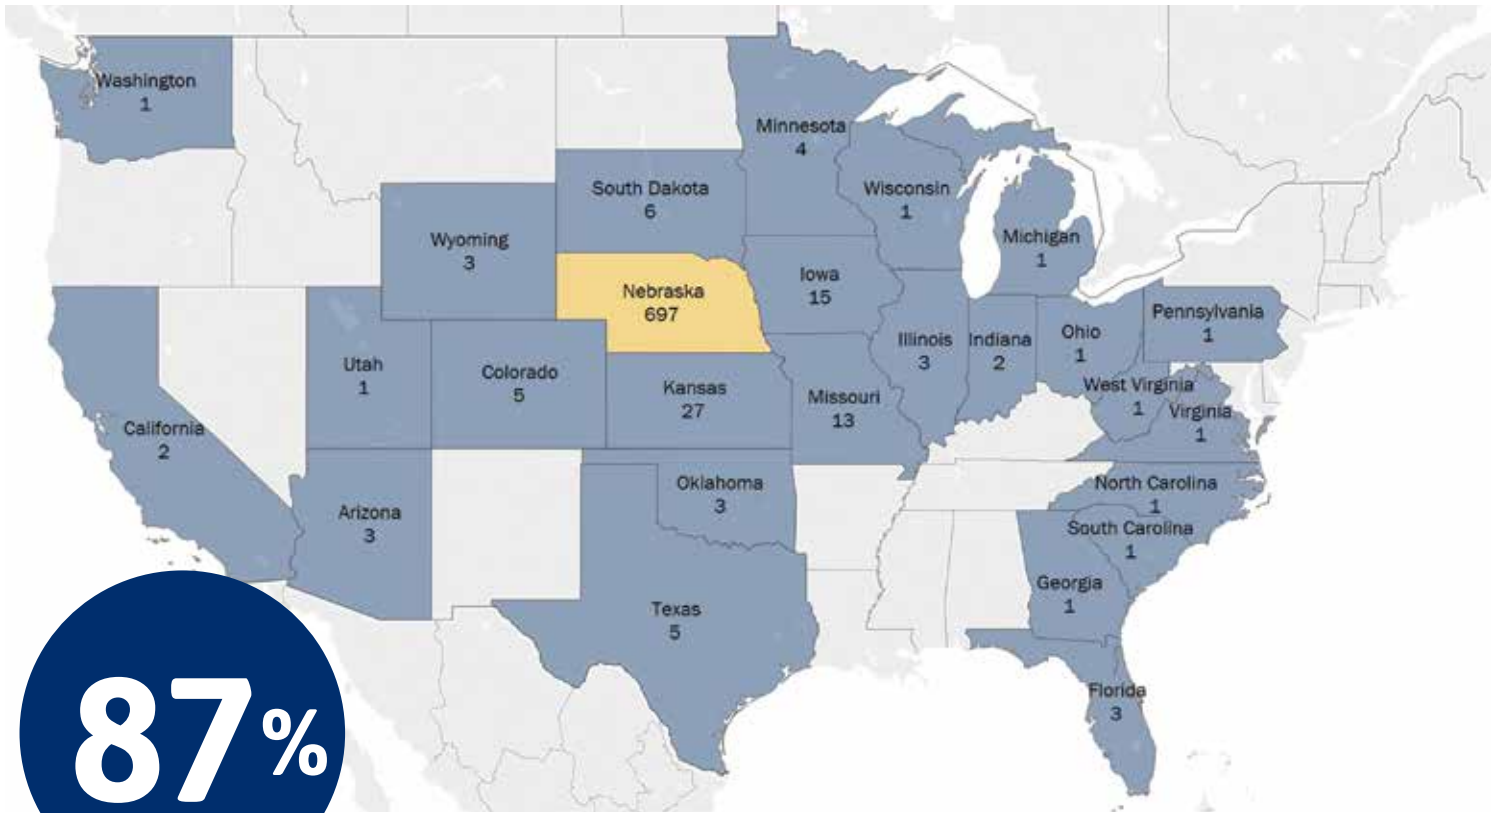

Of 1,305 graduates during the calendar year, only 4.1% of those who responded were not employed or continuing their education.

Employment and Transfer

A large majority of the 921 graduates from Career/Technical fields who responded are employed (83%), and a large majority of the 184 Academic Transfer graduates who responded are continuing their education (77%).

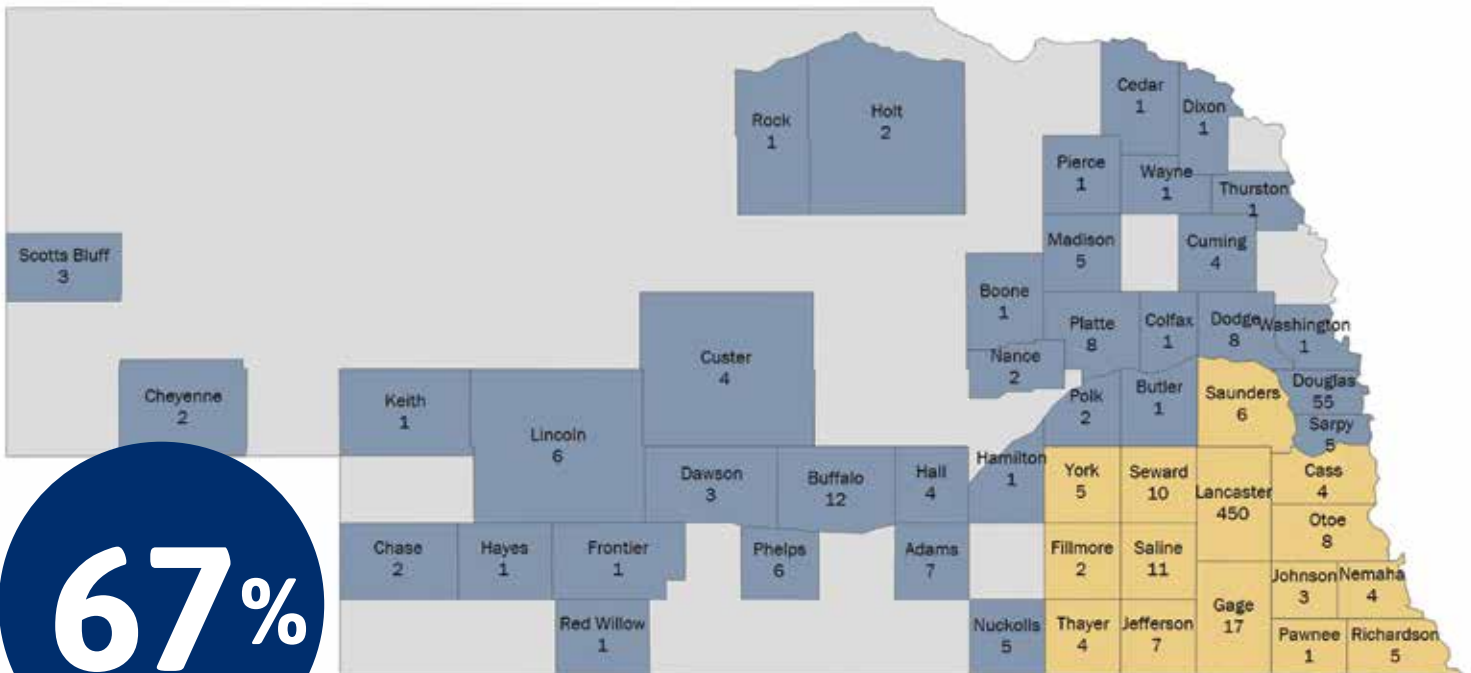

STATE AND REGIONAL IMPACT

87%

of employed graduates are working in Nebraska.

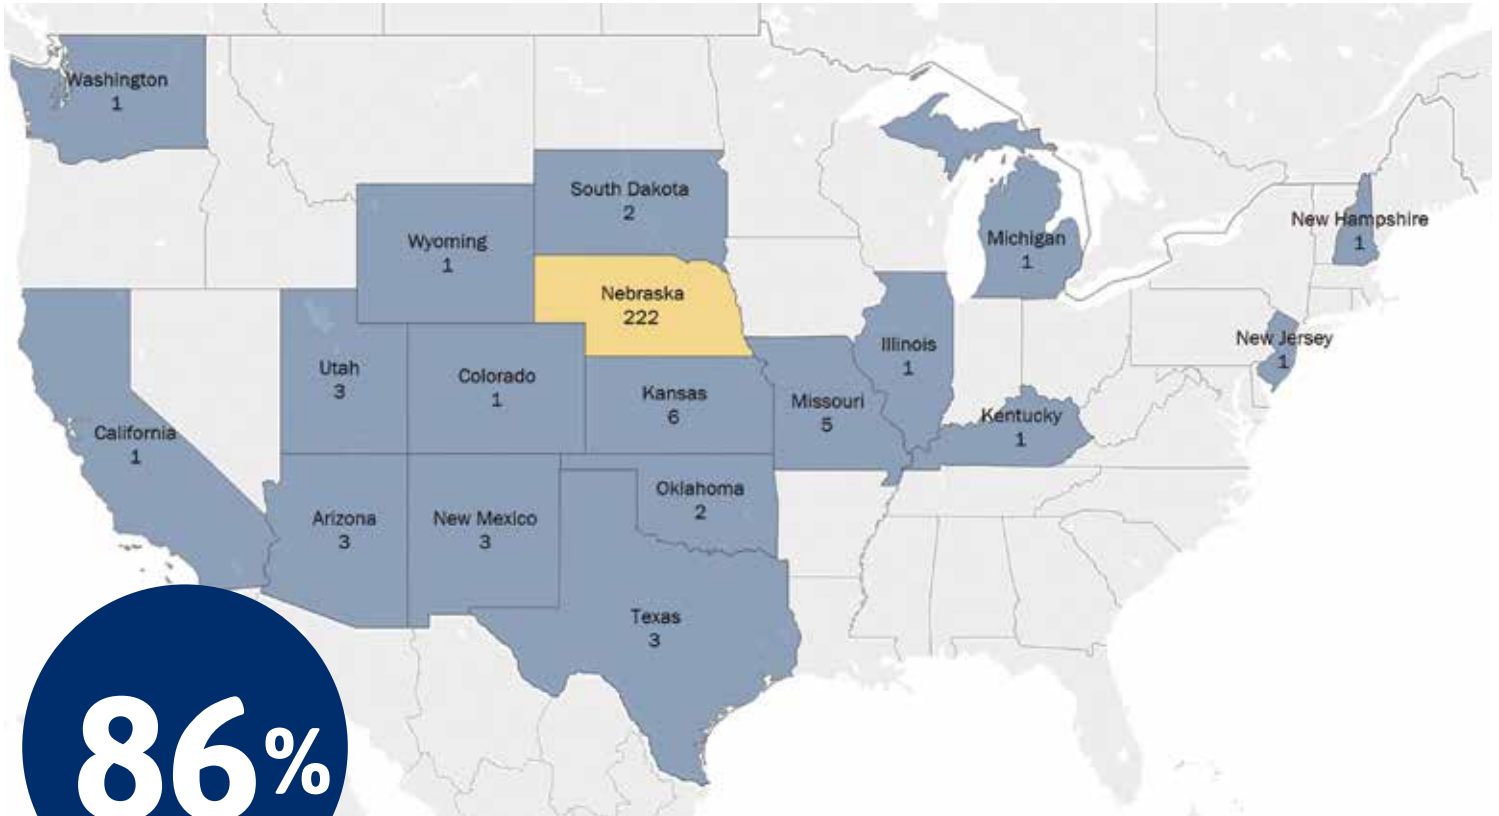

Total employed: 802

67%

of employed graduates are working in our 15-county service area.

CONTINUING EDUCATION

86%

of graduates who are continuing their education are doing so in Nebraska. *Total continuing education: 258*

Gathering Data

Information about the post-graduation status of SCC graduates was collected directly from the graduates at or near the time of graduation and from the National Student Clearinghouse. The information was collected by the Career Services Offices at the time of graduation through personal conversations, classroom visits, telephone calls, emails, mailings, texts and social media. The Career Services Offices reported that it continues to be challenging to get students to respond in the ongoing pandemic, so the response rate is lower than normal.

Wage and employment information has been self-reported by graduates for their first job after graduation. Self-reported continuing education status was supplemented with information from the National Student Clearinghouse.

Twenty-six (26) graduates completed multiple degrees during 2021. All percentages and location-based counts use the unique number of graduates. The data table is based on the number of degrees. In the data table, the graduates who completed multiple degrees will be counted multiple times, once for each degree they received.

- **Number of degrees granted during 2021: 1,335**
- **Number of graduates during 2021: 1,305**
- **Number of graduates who responded: 1,105**
- **Response rate: 84.7%**

2021 Programs of Study	Number of degrees granted	Employed in training-related job	Employed in non-training-related job	Continuing education	Still seeking, Not seeking, No response	Percent employed in Nebraska	Average Starting Hourly Salary	Average Starting Annual Salary

All salaries are based on a 40-hour work week unless noted. Salary statistics reflect certificates, diplomas and associate degrees. The graduates in the "Still Seeking, Not Seeking, No Response" column are not included in the percentage calculations. Values may not add to 100% due to rounding.

(A.A.) = Associate of Arts
(A.S.) = Associate of Science

¹ Salaries were not reported by a large enough sample and have been omitted for confidentiality.

² Pay plans and benefits vary to include commissions and bonuses.

³ Must complete 640 hours of a state-specific Administrator-in-Training program.

⁴ Transfer degree, no salary.

⁵ To obtain a sample large enough to report, salary information is based on graduates from 2020 and 2021.

⁶ To obtain a sample large enough to report, salary information is based on graduates from 2019, 2020 and 2021.

⁷ To obtain a sample large enough to report, salary information is based on graduates from 2016, 2017, 2018, 2019, 2020, and 2021.

⁸ Truck drivers may be paid by the hour, by the week, or based on the number of miles driven. In 2021, the average starting pay for first-year truck drivers in Nebraska was \$46,000-49,000.

SAVE NEBRASKA HALL

Nebraska Hall was constructed more than 100 years ago when it was a hospital for the Soldiers and Sailors home in Milford. In 1941, it was then converted to a dormitory for the new Nebraska Trade School, and it was later renamed to Nebraska Hall. For around 78 years it housed generations of students who attended the College.

Because Nebraska Hall played such a significant role in the history of the College, Milford, Seward County and the state of Nebraska, SCC is trying to find ways to repurpose the building for future generations who will be walking by the historic building as they make their way to class each day.

Students will utilize all floors of the building, as they utilize the services for different stages of their college careers. The College is now seeking private donations to make up the difference to fund this project.

The following is proposed for each of the three levels of the building:

- 3** **Third floor** is devoted to student success and will include Advising, Testing, Career Services, TRIO, CAPS Counseling, Accommodations and the Dean of Students.
- 2** **Second floor** will serve as the space for Admissions, Registration, Financial Aid and the Business Office.
- 1** **First floor** will serve as the SCC Student Union on campus. It will provide students with adequate space to meet, work on group projects and study.

SCC to Receive Nearly \$4.5 Million in City of Lincoln ARP Funds

In March 2022, the city of Lincoln awarded the College nearly \$4.5 million in federal American Rescue Plan funds to address workforce development needs of individuals and communities disproportionately impacted by the COVID-19 pandemic.

SCC was among six grant recipients announced by Lincoln Mayor Leirion Gaylor Baird.

The College will use part of the funds to develop an office of work-based learning, whose purpose will be to create customized training for people who may be under-employed or not employed as a result of COVID-19. The training will allow those individuals to reskill or upskill in high-demand areas.

“We specifically identified information technology, welding, manufacturing, and health sciences as those high-demand areas,” said Dr. Paul Illich, SCC president. “The creation of a dedicated office is the first component.

“The second component is we’re going to create dedicated training spaces and asymmetrical training. We’re going to start with an information technology center that we’ve actually been designing. So this (funding) came at a perfect time as we’re trying to recover from COVID-19. We want to make sure we have the capacity to allow for this training for those that may not need a full credential. Perhaps they just need a couple of weeks or a month or whatever it takes. We want to be able to position ourselves perfectly so we can partner with the city and industry partners to get the exact training they need.”

In direct response to the negative individual and city-wide impacts of COVID-19, and in alignment with the 2020 Mayor’s Economic Recovery Task Force Report, SCC will use the funds to construct and equip flexible and permanent lab spaces for reskilling, upskilling, apprenticeships, and internships in high-demand and high-wage industry sectors, including health sciences, manufacturing and welding, and information technology,

and implement and coordinate customized reskilling/upskilling training and apprenticeship/ internship opportunities via a new SCC Office of Work-based Learning.

Prior to the pandemic in 2020, the city of Lincoln was experiencing significant shortages of skilled workers in many industry sectors, Illich said, and these workforce gaps are projected to expand in the absence of robust interventions.

“Over the past five years, SCC has been pursuing several transformative initiatives to address this barrier to economic growth by expanding our capacity to produce a qualified skilled workforce and affordable access to higher education,” he said.

Illich continued, “This new information technology center (to be built on the Lincoln Campus) is going to be a tremendous opportunity to directly address the skilled workforce shortage we have in that area. We’re going to be able to do the same thing as part of this award in the health sciences, as well as welding and manufacturing. This will be an absolute game-changer as we recover from COVID-19 and move forward in the future. This is a tremendous opportunity for not just SCC and its industry partners, but for the city of Lincoln. Most importantly, those directly impacted by COVID. We’re very excited to be a part of this.”

SCC has a long-standing partnership with the city of Lincoln via the Workforce Innovation & Opportunity Act as a committed service provider for the Greater Lincoln Workforce Development Area. The College provides English as a Second Language and Adult Basic Education courses, as well as programs of study associated with the Carl Perkins Career and Technical Act and the Nebraska GAP Assistance Program. SCC also partners directly with the American Job Center by providing advising, testing and credit and non-credit training opportunities.
